

Cannon Veterinary Services

31310 Woodhaven Trail Cannon Falls MN 55009 651-258-4050

Mare Breeding Package at CVS facility only

(No on farm work is included in the package price)

The fee of \$350.00 (for one estrus cycle at CVS)

Includes the following services:

- Rectal palpations
- Ultrasound Exams (during estrus cycle and at 14 to 16 days)
- Receiving of semen shipment and processing of paperwork
- Artificial insemination with fresh or cooled semen
- Semen Check
- Artificial Light therapy if needed.
- Pregnancy check at 14-16 days post breeding

* Good conception rates are obtainable when using transported cooled semen but mare management and timing is critical. The mare's cycle must be carefully monitored by rectal palpation and ultrasonography. The semen is ordered to arrive just before the mare is expected to ovulate. If necessary, hormonal treatments will be used to assist in achieving optimal timing of ovulation.

The fee does not include:

- Injections of sedation, luteal phase, HCG or oxytocin
- Rhinomune Vaccination (Prior to breeding, 5, 7, and 9 months)
- Progesterone assay or Hormone analysis
- Regumate
- Return shipment of equitainer
- Twin Pregnancy Reduction and Management
- Mare Care/Board \$20/day
- Mare & Foal Care/Board \$25/day

* If your mare is not pregnant after the first insemination attempt, veterinary care will be discounted to \$300. Mare care/boarding fees still apply.
